

# RECON SCOUT™

Know Before You Go™

## The Recon Scout™ Command Monitoring Station

The Recon Scout provides mission critical video reconnaissance for tactical teams deployed in hostile environments, protecting those in harm's way. The Command Monitoring Station provides the real-time intelligence gathered by the Recon Scout to the rest of the team a safe distance away.

The high-gain directional antenna is designed to receive the Recon Scout video signal from approximately 1,000 feet away<sup>1</sup>. The included software enables video recording or digital still image capture<sup>2</sup>. RCA jacks allow integration into any standard video capture system.

### The complete kit includes

- High Gain YAGI Antenna<sup>3</sup>
- Tripod and Mount
- Video Receive Module w/ USB Interface
- Software
- Power Cord (US or Europe)
- User Manual
- 10' and 30' coax cables

### Specs

- Input Voltage: 120/240V, 50-60Hz
- Resolution: 640x480
- Range: up to 1,000 feet

### Minimum System Requirements

Pentium™ 4 Processor, 1 GHz or faster  
128 MB of RAM  
Microsoft Windows XP™ w/ SP 1 or above

### Recommended System Requirements

Pentium™ 4 Processor, 2.5 GHz or faster  
1 GB of RAM  
Microsoft Windows XP™ w/ SP 1 or above

It is advised to have at least 5GB of free hard drive space for recording video.

<sup>1</sup> Actual range may vary depending upon environment.

<sup>2</sup> Computer for capture not included.

<sup>3</sup> Antenna may vary from the model pictured.
